Versions

Below is a non-exhaustive list of versions and their maintenance status:

Version	Release Date	Active Support	Security Support
3.7	May 05, 2026	Yes	Yes
3.6	Nov 07, 2025	Ended May 07, 2026	Ended Aug 16, 2026
3.5	Jul 23, 2025	Ended Nov 07, 2025	No
3.4	May 05, 2025	Ended Jul 23, 2025	No
3.3	Jan 06, 2025	Ended May 05, 2025	No
3.2	Oct 28, 2024	Ended Jan 06, 2025	No
3.1	Jul 15, 2024	Ended Oct 28, 2024	No
3.0	Apr 29, 2024	Ended Jul 15, 2024	No
2.11	Feb 12, 2024	Ended Apr 29, 2025	Ends Sept 07, 2026

??? example "Active Support / Security Support"

```
- **Active support**: Receives any bug fixes.

- **Security support**: Receives only critical bug and security fixes.
```

This page is maintained and updated periodically to reflect our roadmap and any decisions affecting the end of support for Traefik Proxy.

Please refer to our migration guides for specific instructions on upgrading between versions, an example is the v2 to v3 migration guide.

!!! important "All target dates for end of support or feature removal announcements may be subject to change."

Versioning Scheme

The Traefik Proxy project follows the semantic versioning scheme and maintains a separate branch for each minor version. The main branch always represents the next upcoming minor or major version.

And these are our guiding rules for version support, as of Traefik v3.6:

- **Every** `minor` is supported for 6 months from its GA release date, which means several `minor` versions can be supported at the same time
- **The last** `minor` **after releasing a new** `major` is supported for 2 years following the `major` release (starting with v3)
- **Previous rules are subject to change** and in such cases an announcement will be made publicly, here is an example extending v1.x branch support.

!!! note "Versions released before v3.6"

```
These rules apply starting with Traefik v3.6. Before that, only the latest `minor` was on active support at any given time, and support for a `minor` ended as soon as the next one was released.
```
