Page Settings

- JSON Structure
- Saved Data
- Examples
  - Empty Page Example
  - Styled Page Example

Data from the Page Settings panel is saved as a separate `page_settings` value. When the page has no settings, the value is an empty `array`, when the page has settings it's an `object` of key-value pairs containing the settings.

JSON Structure

If the page has no settings, `page_settings` is an empty `array`:

```
{
  "title": "Template Title",
  "type": "page",
  "version": "0.4",
  "page_settings": [],
  "content": []
}
```

If the page has settings, `page_settings` is an `object` of key-value pairs:

```
{
  "title": "Template Title",
  "type": "page",
  "version": "0.4",
```

```
"page_settings": {
  "key": "value",
  "key": "value"
},
"content": []
}
```

Saved Data

The Page Settings panel displays several editor controls that allow the user to change WordPress-related data and Elementor-related data.

The WordPress-related data includes the page title, excerpt, feature image, post status, etc. This data is saved in the "wp_posts" table in the database.

Elementor-related data includes all the elements/widget in the page and how they are styled. This data is saved in the "wp_postmeta" table, part of the Elementor custom field.

Furthermore, different Elementor documents may have different page settings. A good example is popups, which add additional controls to the page settings screen. Addon developers may also add additional controls to the page settings panel, controls that may apply page-wide styles. The data from all those controls is stored in `page_settings`.

Examples

Empty Page Example

An empty page that has no settings:

```
{
"title": "About Page",
"type": "page",
"version": "0.4",
"page_settings": [],
"content": []
}
```

Styled Page Example

A page that has some basic styling settings:

```
{
  "title": "Template Title",
  "type": "page",
  "version": "0.4",
  "page_settings": {
    "background_background": "classic",
    "background_color": "#FFFFFF",
    "margin": {
      "unit": "px",
      "top": "0",
      "right": "0",
      "bottom": "0",
      "left": "0",
      "isLinked": true
    },
    "padding": {
      "unit": "px",
      "top": "0",
      "right": "10",
      "bottom": "0",
      "left": "10",
      "isLinked": false
    },
    "scroll_snap": "yes"
  },
  "content": []
}
```
