数据 API 允许您查看所有可用的数据类型。

列出所有数据

此 API 允许您检索并查看可用数据端点的简单列表。

HTTP request

GET

/wp-json/wc/v3/data

```
curl https://example.com/wp-json/wc/v3/data \
-u consumer_key:consumer_secret
```

```
WooCommerce.get("data")
  .then((response) => {
    console.log(response.data);
  })
  .catch((error) => {
    console.log(error.response.data);
  });
```

```
<?php print_r($woocommerce->get('data')); ?>
```

```
print(wcapi.get("data").json())
```

```
woocommerce.get("data").parsed_response
```

> JSON response example:

```

Continents properties

Attribute	Type	Description
`code`	string	2 character continent code. *read-only*
`name`	string	Full name of continent. *read-only*
`countries`	array	List of countries on this continent. See Continents - Countries properties *read-only*

Continents - Countries properties

Attribute	Type	Description
`code`	string	ISO3166 alpha-2 country code. *read-only*
`currency_code`	string	Default ISO4127 alpha-3 currency code for the country. *read-only*
`currency_pos`	string	Currency symbol position for this country. *read-only*
`decimal_sep`	string	Decimal separator for displayed prices for this country. *read-only*
`dimension_unit`	string	The unit lengths are defined in for this country. *read-only*
`name`	string	Full name of country. *read-only*
`num_decimals`	integer	Number of decimal points shown in displayed prices for this country. *read-only*
`states`	array	List of states in this country. See Continents - Countries - States properties *read-only*
`thousand_sep`	string	Thousands separator for displayed prices in this country. *read-only*
`weight_unit`	string	The unit weights are defined in for this country. *read-only*

Continents - Countries - States properties

Attribute	Type	Description

`code`	string	State code. *read-only*
`name`	string	Full name of state. *read-only*

Countries - States properties

Attribute	Type	Description
`code`	string	State code. *read-only*
`name`	string	Full name of state. *read-only*

获取国家数据

此 API 允许您检索和查看国家数据。

HTTP 请求

GET

/wp-json/wc/v3/data/countries/<location>

```
curl https://example.com/wp-json/wc/v3/data/countries/br \
□-u consumer_key:consumer_secret
```

```
WooCommerce.get("data/countries/br")
  .then((response) => {
    console.log(response.data);
  })
  .catch((error) => {
```

```
    console.log(error.response.data);
  });
```

```
<?php
print_r($woocommerce->get('data/countries/br'));
?>
```

```
print(wcapi.get("data/countries/br").json())
```

```
woocommerce.get("data/countries/br").parsed_response
```

> JSON 响应示例:

```

□}
]
```

Currencies properties

Attribute	Type	Description
`code`	string	ISO4217 currency code. *read-only*
`name`	string	Full name of currency. *read-only*

Attribute	Type	Description
`symbol`	string	Currency symbol. *read-only*

Retrieve currency data

This API lets you retrieve and view a currency data.

HTTP request

GET

/wp-json/wc/v3/data/currencies/<currency>

```
curl https://example.com/wp-json/wc/v3/data/currencies/brl \
-u consumer_key:consumer_secret
```

```
WooCommerce.get("data/currencies/brl")
  .then((response) => {
    console.log(response.data);
  })
  .catch((error) => {
    console.log(error.response.data);
  });
```

```
<?php
print_r($woocommerce->get('data/currencies/brl'));
?>
```

```
print(wcapi.get("data/currencies/brl").json())
```

```
woocommerce.get("data/currencies/brl").parsed_response
```

> JSON response example:

```
{
"code": "BRL",
"name": "Brazilian real",
```

```
  "symbol": "&#82;&#36;",
  "_links": {
    "self": [
      {
        "href": "https://example.com/wp-json/wc/v3/data/currencies/BRL"
      }
    ],
    "collection": [
      {
        "href": "https://example.com/wp-json/wc/v3/data/currencies"
      }
    ]
  }
}
```

货币属性

请参阅 货币属性列表 。

获取当前货币

此 API 允许您检索并查看商店的当前货币数据。

HTTP 请求

GET

/wp-json/wc/v3/data/currencies/current

```
curl https://example.com/wp-json/wc/v3/data/currencies/current \
  -u consumer_key:consumer_secret
```

```
WooCommerce.get("data/currencies/current")
  .then((response) => {
    console.log(response.data);
  })
  .catch((error) => {
    console.log(error.response.data);
  });
```

```php
<?php
print_r($woocommerce->get('data/currencies/current'));
?>
```

```python
print(wcapi.get("data/currencies/current").json())
```

```ruby
woocommerce.get("data/currencies/current").parsed_response
```

> JSON 响应示例:

```
{
  "code": "USD",
  "name": "United States (US) dollar",
  "symbol": "&#36;",
  "_links": {
    "self": [
      {
        "href": "https://example.com/wp-json/wc/v3/data/currencies/USD"
      }
    ],
    "collection": [
      {
        "href": "https://example.com/wp-json/wc/v3/data/currencies"
      }
    ]
  }
}
```
