API [] []

Attribute	Type	Description
<code>id</code>	integer	Coupon ID (post ID) <i>read-only</i>
<code>code</code>	string	Coupon code, always lowercase <i>mandatory</i>
<code>type</code>	string	Coupon type, valid core types are: <code>fixed_cart</code> , <code>percent</code> , <code>fixed_product</code> and <code>percent_product</code> . Default is <code>fixed_cart</code>
<code>created_at</code>	string	UTC DateTime when the coupon was created <i>read-only</i>
<code>updated_at</code>	string	UTC DateTime when the coupon was last updated <i>read-only</i>
<code>amount</code>	string	The amount of discount
<code>individual_use</code>	boolean	Whether coupon can only be used individually
<code>product_ids</code>	array	Array of product ID's the coupon can be used on
<code>exclude_product_ids</code>	array	Array of product ID's the coupon cannot be used on
<code>usage_limit</code>	integer	How many times the coupon can be used
<code>usage_limit_per_user</code>	integer	How many times the coupon can be user per customer
<code>limit_usage_to_x_items</code>	integer	Max number of items in the cart the coupon can be applied to
<code>usage_count</code>	integer	Number of times the coupon has been used already <i>read-only</i>
<code>expiry_date</code>	string	UTC DateTime`when the coupon expires
<code>enable_free_shipping</code>	boolean	Is the coupon for free shipping
<code>product_category_ids</code>	array	Array of category ID's the coupon applies to
<code>exclude_product_category_ids</code>	array	Array of category ID's the coupon does not apply to
<code>exclude_sale_items</code>	boolean	Exclude sale items from the coupon
<code>minimum_amount</code>	string	Minimum order amount that needs to be in the cart before coupon applies
<code>maximum_amount</code>	string	Maximum order amount allowed when using the coupon

Attribute	Type	Description
customer_emails	array	Array of email addresses that can use this coupon
description	string	Coupon description

Create a Coupon

This API helps you to create a new coupon.

API

HTTP

DELETE

/wc-api/v3/coupons/<id>

```
curl -X DELETE https://example.com/wc-api/v3/coupons/529/?force=true \
-u consumer_key:consumer_secret
```

```
WooCommerce.delete('coupons/529/?force=true', function(err, data, res) {
  console.log(res);
});
```

```
<?php print_r($woocommerce->delete('coupons/529', ['force' => true])); ?>
```

```
print(wcapi.delete("coupons/529", params={"force": True}).json())
```

```
woocommerce.delete("coupons/529", force: true).parsed_response
```

JSON

```
{
  "message": "Permanently deleted coupon"
}
```

Parameters

Parameter	Type	Description
force	string	Use <code>true</code> whether to permanently delete the coupon, defaults to <code>false</code> . Note that permanently deleting the coupon will return HTTP 200 rather than HTTP 202.
