

??

Synced patterns, which were previously called Reusable Blocks, are Blocks that you can re-use anywhere on your site. A Synced pattern can be added to any Page or Post, and as many times as you want. If you update or change the style of your Synced pattern, the changes are automatically applied to that block, right across your whole site. To create a **Synced pattern**, simply add a block, add your content to the block then style it how you'd like it to appear. Once you've got the block looking how you want it, click the **Create pattern/reusable block** option under the **Options** icon on the Block Toolbar. You're then prompted to enter a name for your Synced pattern. After doing so, click the **Create** button to save it. Your new Synced pattern/ Reusable Block will appear under the Synced patterns tab (Block Inserter Reusable blocks tab) within the Block Inserter. Reusable Blocks If you'd like to remove or edit any of your Synced patterns, you can click on the **Manage patterns** option under the **Options** icon at the top-right of the page, or the **Manage my patterns** link underneath your list of Synced patterns in the Synced patterns tab within the Block Inserter. Once you click this option, you're presented with a list of all your existing Synced patterns which you can then edit or delete. Before clicking the **Manage patterns** option, ensure that you save your current Page or Post to avoid losing your recent changes.
