## GLOBAL PARAMETERS

These [global parameters](#) have the same behavior across all commands and affect how WP-CLI interacts with WordPress.

| Argument                         | Description                                                                                           |
|----------------------------------|-------------------------------------------------------------------------------------------------------|
| <code>--path=&lt;path&gt;</code> | Path to the WordPress files.                                                                          |
| <code>--url=&lt;url&gt;</code>   | Pretend request came from given URL. In multisite, this argument is how the target site is specified. |

| Argument                                                        | Description                                                                                                                                      |
|-----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| --<br>ssh=[<scheme>:][<user>@]<host container>[:<port>][<path>] | Perform operation against a remote server over SSH (or a container using scheme of "docker", "docker-compose", "docker-compose-run", "vagrant"). |
| --http=<http>                                                   | Perform operation against a remote WordPress installation over HTTP.                                                                             |
| --user=<id login email>                                         | Set the WordPress user.                                                                                                                          |
| --skip-plugins[=<plugins>]                                      | Skip loading all plugins, or a comma-separated list of plugins. Note: mu-plugins are still loaded.                                               |
| --skip-themes[=<themes>]                                        | Skip loading all themes, or a comma-separated list of themes.                                                                                    |
| --skip-packages                                                 | Skip loading all installed packages.                                                                                                             |
| --require=<path>                                                | Load PHP file before running the command (may be used more than once).                                                                           |
| --exec=<php-code>                                               | Execute PHP code before running the command (may be used more than once).                                                                        |
| --context=<context>                                             | Load WordPress in a given context.                                                                                                               |
| --[no-]color                                                    | Whether to colorize the output.                                                                                                                  |
| --debug[=<group>]                                               | Show all PHP errors and add verbosity to WP-CLI output. Built-in groups include: bootstrap, commandfactory, and help.                            |
| --prompt[=<assoc>]                                              | Prompt the user to enter values for all command arguments, or a subset specified as comma-separated values.                                      |
| --quiet                                                         | Suppress informational messages.                                                                                                                 |
