Given /^a downloaded Phar with (?:the same version|version "([^"]+)")$/

- Usage
- Related

Download a specific WP-CLI Phar version from GitHub.

Usage

```
Scenario: My example scenario
  Given an empty directory
  And a downloaded Phar with version "2.11.0"

Scenario: My other scenario
  Given an empty directory
  And a downloaded Phar with the same version
```

Behat steps documentation is generated from the WP-CLI codebase on every release. To suggest improvements, please submit a pull request.

Related

- **Given an empty directory** - Creates an empty directory.
- **Given /^an? (empty|non-existent) ([^\s]+) directory$/** - Creates or deletes a specific directory.
- **Given an empty cache** - Clears the WP-CLI cache directory.
- **Given /^an? ("[^"]+"|[^\s]+) (file|cache file):$/** - Creates a file with the given contents.
- **Given /^"([^"]+)" replaced with "([^"]+)" in the ([^\s]+) file$/** - Search and replace a string in a file using regex.
- **Given /^that HTTP requests to (.*?) will respond with:$/** - Mock HTTP requests to a given URL.
- **Given WP files** - Download WordPress files without installing.
- **Given wp-config.php** - Create a wp-config.php file using `wp config create`.
- **Given a database** - Creates an empty database.
- **Given /^a WP(\d[^\s]+)? install(?:ation)?$/** - Installs WordPress.
- **Given /^a WP([^\s]+)? install(?:ation)? in ['"]?([^'"]+)['"]?$/** - Installs WordPress in a given directory.
- **Given a WP install(ation) with Composer** - Installs WordPress with Composer.
