When /^I (run|try) `([^`]+)` from '([^\s]+)'$/

- Usage
- Related

Run or try a given command in a subdirectory.

Usage

`run` expects an exit code 0, whereas `try` allows for non-zero exit codes.

```
Scenario: My example scenario
  When I run `wp core is-installed`
  Then STDOUT should be empty

  When I run `wp core is-installed` from 'foo/wp-content'
  Then STDOUT should be empty
```

Behat steps documentation is generated from the WP-CLI codebase on every release. To suggest improvements, please submit a pull request.
