

WP_CLI::do_hook()

- [Usage](#)
 - [Notes](#)
 - [Related](#)
-

Execute callbacks registered to a given hook.

Usage

```
WP_CLI::do_hook( $when, $args )
```

\$when (string) Identifier for the hook.

...\$args (mixed) Optional. Arguments that will be passed onto the callback provided by `WP_CLI::add_hook()`.

@return (null|mixed) the first optional argument if optional arguments were passed, otherwise returns null.

Notes

See `WP_CLI::add_hook()` for details on WP-CLI's internal hook system. Commands can provide and call their own hooks.

Internal API documentation is generated from the WP-CLI codebase on every release. To suggest improvements, please submit a pull request.
