

WP_CLI::line()

- [Usage](#)
 - [Notes](#)
 - [Related](#)
-

Display informational message without prefix, and ignore `--quiet`.

Usage

```
WP_CLI::line( $message = '', $newline = true )
```

\$message (string) Message to display to the end user.

\$newline (bool) Optional. Whether to append a newline to the end of the message. Default true.

@return (void)

Notes

Message is written to STDOUT. `WP_CLI::log()` is typically recommended; `WP_CLI::line()` is included for historical compat.

Internal API documentation is generated from the WP-CLI codebase on every release. To suggest improvements, please submit a pull request.
