WP_CLI\Utils\get_flag_value()

- Usage
- Notes
- Related

Return the flag value or, if it's not set, the $default value.

Usage

```
WP_CLI\Utils\get_flag_value( $assoc_args, $flag, $default = null )
```

mixed> (array<string|int,) $assoc_args Arguments array.
$flag (string|int) Flag to get the value.
$default (mixed) Default value for the flag. Default: NULL.
@return (mixed)

Notes

Because flags can be negated (e.g. --no-quiet to negate --quiet), this function provides a safer alternative to using `isset( $assoc_args['quiet'] )` or similar.

Internal API documentation is generated from the WP-CLI codebase on every release. To suggest improvements, please submit a pull request.
