@wordpress/block-serialization-spec-parser

- Installation
- Usage
- Contributing to this package

This library contains the grammar file (`grammar.pegjs`) for WordPress posts which is a block serialization *specification* which is used to generate the actual *parser* which is also bundled in this package.

PEG parser generators are available in many languages, though different libraries may require some translation of this grammar into their syntax. For more information see:

- PEG.js
- Parsing expression grammar

Installation

Install the module

```
npm install @wordpress/block-serialization-spec-parser --save
```

Usage

```
import { parse } from '@wordpress/block-serialization-spec-parser';

parse( '<!-- wp:core/more --><!--more--><!-- /wp:core/more -->' );
// [{"attrs": null, "blockName": "core/more", "innerBlocks": [], "innerHTML": "<!--more-->"}]
```

Contributing to this package

This is an individual package that’s part of the Gutenberg project. The project is organized as a monorepo. It’s made up of multiple self-contained software packages, each with a specific purpose.

The packages in this monorepo are published to npm and used by WordPress as well as other software projects.

To find out more about contributing to this package or Gutenberg as a whole, please read the project’s main contributor guide.
