# @wordpress/create-block-interactive-template

- Usage
- Variants
  - default
  - typescript
  - client-side-navigation
- Contributing to this package

This is a template for `@wordpress/create-block` to create interactive blocks.

## Usage

This block template can be used by running the following command:

```
npx @wordpress/create-block --template @wordpress/create-block-interactive-template
```

It requires at least WordPress 6.5 or Gutenberg 17.7.

## Variants

This template exposes three variants. Use the `--variant` flag to select one:

### `default`

The standard interactive block scaffold. Uses the Interactivity API to demonstrate reactive state, context, and DOM event handling.

```
npx @wordpress/create-block --template @wordpress/create-block-interactive-template --variant default
```

This is also the variant used when no `--variant` flag is provided.

### `typescript`

Same as `default` but the view script (`view.ts`) is written in TypeScript, with fully typed store state and context.

```
npx @wordpress/create-block --template @wordpress/create-block-interactive-template --variant typescript
```

### `client-side-navigation`

Demonstrates client-side navigation powered by `@wordpress/interactivity-router`. The block renders a quote navigator whose Prev / Next links swap page content without a full reload. A client-side stopwatch running outside the router region proves that no full page reload occurred.

```
npx @wordpress/create-block --template @wordpress/create-block-interactive-template --variant client-side-navigation
```

This variant adds `@wordpress/interactivity-router` as an additional npm dependency.

# Contributing to this package

This is an individual package that’s part of the Gutenberg project. The project is organized as a monorepo. It’s made up of multiple self-contained software packages, each with a specific purpose. The packages in this monorepo are published to npm and used by WordPress as well as other software projects.

To find out more about contributing to this package or Gutenberg as a whole, please read the project’s main contributor guide.
