@wordpress/postcss-themes

□□

- Installation
- Contributing to this package

PostCSS plugin to generate theme colors.

Installation

Install the module

```
npm install @wordpress/postcss-themes --save
```

Note: This package requires Node.js version with long-term support status (check Active LTS or Maintenance LTS releases). It is not compatible with older versions.

Contributing to this package

This is an individual package that's part of the Gutenberg project. The project is organized as a monorepo. It's made up of multiple self-contained software packages, each with a specific purpose. The packages in this monorepo are published to npm and used by WordPress as well as other software projects.

To find out more about contributing to this package or Gutenberg as a whole, please read the project's main contributor guide.
