@wordpress/reusable-blocks

□□

- Contributing to this package

The reusable blocks module is deprecated. It remains available as a no-op compatibility package so existing imports, script handles, and `core/reusable-blocks` data-store access do not crash.

`ReusableBlocksMenuItems` renders nothing, and the store's selectors and actions (`__experimentalConvertBlockToStatic`, `__experimentalConvertBlocksToReusable`, `__experimentalDeleteReusableBlock`, `__experimentalSetEditingReusableBlock`, `__experimentalIsEditingReusableBlock`) are inert.

Reusable blocks (patterns) are `wp_block` entities, managed through `@wordpress/core-data`. That covers entity operations only; there is no public replacement for the conversion utilities or menu items.

Contributing to this package

This is an individual package that's part of the Gutenberg project. The project is organized as a monorepo. It's made up of multiple self-contained software packages, each with a specific purpose.

The packages in this monorepo are published to npm and used by WordPress as well as other software projects.

To find out more about contributing to this package or Gutenberg as a whole, please read the project's main contributor guide.
