This page lists the blocks included in the block-library package.

- Items marked with a strikeout (~~strikeout~~) are explicitly disabled.
- Blocks marked with **Experimental:** true are only available when Gutenberg is active.
- Blocks marked with **Experimental:** fse are only available in the Site Editor.

Deprecated blocks — the following blocks are deprecated and should not be used in new content.

- Comment Author Avatar (deprecated) (`core/comment-author-avatar`) — Please use the Avatar block instead.
- Author (deprecated) (`core/post-author`) — Please use the Avatar block, the Author Name block, and the Author Biography block instead.
- Comment (deprecated) (`core/post-comment`) — Please use the Comments block instead.

- Text Columns (deprecated) (`core/text-columns`) — Please use the Columns block instead.

Accordion

Displays a foldable layout that groups content in collapsible sections.

- **Name:** core/accordion
- **Category:** design
- **Allowed Blocks:** core/accordion-item
- **Supports:** align (full, wide), anchor, ariaLabel, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), contentRole, interactivity, layout, listView, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** autoclose, headingLevel, iconPosition, levelOptions, showIcon

Accordion Heading

Displays a heading that toggles the accordion panel.

- **Name:** core/accordion-heading
- **Category:** design
- **Parent:** core/accordion-item
- **Supports:** anchor, background (gradient), color (background, gradients, text), interactivity, shadow, spacing (padding), typography (fontSize, lineHeight), ~~align~~, ~~lock~~, ~~visibility~~
- **Attributes:** iconPosition, level, openByDefault, showIcon, title

Accordion Item

Wraps the heading and panel in one unit.

- **Name:** core/accordion-item
- **Category:** design
- **Parent:** core/accordion
- **Allowed Blocks:** core/accordion-heading, core/accordion-panel

- **Supports:** background (gradient), color (background, button, gradients, heading, link, text), contentRole, interactivity, layout (~~allowEditing~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** openByDefault

Accordion Panel

Contains the hidden or revealed content beneath the heading.

- **Name:** core/accordion-panel
- **Category:** design
- **Parent:** core/accordion-item
- **Supports:** allowedBlocks, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), contentRole, interactivity, layout (~~allowEditing~~), shadow, spacing (blockGap, padding), typography (fontSize, lineHeight), ~~html~~, ~~lock~~, ~~visibility~~
- **Attributes:** templateLock

Archives

Display a date archive of your posts.

- **Name:** core/archives
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** displayAsDropdown, showLabel, showPostCounts, type

Audio

Embed a simple audio player.

- **Name:** core/audio
- **Category:** media
- **Supports:** align, anchor, color (link, ~~background~~, ~~text~~), interactivity (clientNavigation), spacing (margin, padding)

- **Attributes:** autoplay, blob, caption, id, loop, preload, src

Avatar

Add a user’s avatar.

- **Name:** core/avatar
- **Category:** theme
- **Supports:** align, anchor, color (~~background~~, ~~text~~), filter (duotone), interactivity (clientNavigation), shadow, spacing (margin, padding), ~~alignWide~~, ~~html~~
- **Attributes:** isLink, linkTarget, size, userId

Pattern

Reuse this design across your site.

- **Name:** core/block
- **Category:** reusable
- **Supports:** interactivity (clientNavigation), ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~inserter~~, ~~renaming~~, ~~visibility~~
- **Attributes:** content, ref

Breadcrumbs

Display a breadcrumb trail showing the path to the current page.

- **Name:** core/breadcrumbs
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** prefersTaxonomy, separator, showCurrentItem, showHomeItem, showOnHomePage

Button

Prompt visitors to take action with a button-style link.

- **Name:** core/button
- **Category:** design
- **Parent:** core/buttons
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (width), interactivity (clientNavigation), shadow, spacing (padding), splitting, typography (fontSize, lineHeight, textAlign), ~~alignWide~~, ~~align~~, ~~reusable~~
- **Attributes:** backgroundColor, gradient, linkTarget, placeholder, rel, tagName, text, textColor, title, type, url

Buttons

Prompt visitors to take action with a group of button-style links.

- **Name:** core/buttons
- **Category:** design
- **Allowed Blocks:** core/button
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, ~~text~~), contentRole, dimensions (minHeight, minWidth), interactivity (clientNavigation), layout (default, ~~allowInheriting~~, ~~allowSwitching~~), listView, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~

Calendar

A calendar of your site’s posts.

- **Name:** core/calendar
- **Category:** widgets
- **Supports:** align, anchor, color (background, link, text), interactivity (clientNavigation), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** month, year

Terms List

Display a list of all terms of a given taxonomy.

- **Name:** core/categories
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textColumns), ~~html~~
- **Attributes:** displayAsDropdown, label, showEmpty, showHierarchy, showLabel, showOnlyTopLevel, showPostCounts, taxonomy

Code

Display code snippets that respect your spacing and tabs.

- **Name:** core/code
- **Category:** text
- **Supports:** align (wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight)
- **Attributes:** content

Column

A single column within a columns block.

- **Name:** core/column
- **Category:** design
- **Parent:** core/columns
- **Supports:** allowedBlocks, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), interactivity (clientNavigation), layout, shadow, spacing (blockGap, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** templateLock, verticalAlignment, width

Columns

Display content in multiple columns, with blocks added to each column.

- **Name:** core/columns
- **Category:** design
- **Allowed Blocks:** core/column
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout (default, ~~allowEditing~~, ~~allowInheriting~~, ~~allowSwitching~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** isStackedOnMobile, templateLock, verticalAlignment

Comment Author Avatar (deprecated)

This block is deprecated. Please use the Avatar block instead.

- **Name:** core/comment-author-avatar
- **Experimental:** fse
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** color (background, ~~text~~), interactivity (clientNavigation), spacing (margin, padding), ~~html~~, ~~inserter~~
- **Attributes:** height, width

Comment Author Name

Displays the name of the author of the comment.

- **Name:** core/comment-author-name
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** isLink, linkTarget

Comment Content

Displays the contents of a comment.

- **Name:** core/comment-content
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** anchor, background (gradient), color (background, button, gradients, heading, link, text), spacing (padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Comment Date

Displays the date on which the comment was posted.

- **Name:** core/comment-date
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** format, isLink

Comment Edit Link

Displays a link to edit the comment in the WordPress Dashboard. This link is only visible to users with the edit comment capability.

- **Name:** core/comment-edit-link
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** anchor, background (gradient), color (background, gradients, link, ~~text~~), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** linkTarget

Comment Reply Link

Displays a link to reply to a comment.

- **Name:** core/comment-reply-link
- **Category:** theme
- **Ancestor:** core/comment-template
- **Supports:** anchor, background (gradient), color (background, gradients, link, ~~text~~), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Comment Template

Contains the block elements used to display a comment, like the title, date, author, avatar and more.

- **Name:** core/comment-template
- **Category:** design
- **Parent:** core/comments
- **Supports:** align, anchor, interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~

Comments

An advanced block that allows displaying post comments using different visual configurations.

- **Name:** core/comments
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** legacy, tagName

Comments Pagination

Displays a paginated navigation to next/previous set of comments, when applicable.

- **Name:** core/comments-pagination
- **Category:** theme

- **Parent:** core/comments
- **Allowed Blocks:** core/comments-pagination-previous, core/comments-pagination-numbers, core/comments-pagination-next
- **Supports:** align, anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), layout (default, ~~allowInheriting~~, ~~allowSwitching~~), spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** paginationArrow

Comments Next Page

Displays the next comment's page link.

- **Name:** core/comments-pagination-next
- **Category:** theme
- **Parent:** core/comments-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), spacing (padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** label

Comments Page Numbers

Displays a list of page numbers for comments pagination.

- **Name:** core/comments-pagination-numbers
- **Category:** theme
- **Parent:** core/comments-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~

Comments Previous Page

Displays the previous comment's page link.

- **Name:** core/comments-pagination-previous
- **Category:** theme

- **Parent:** core/comments-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), spacing (padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** label

Comments Title

Displays a title with the number of comments.

- **Name:** core/comments-title
- **Category:** theme
- **Ancestor:** core/comments
- **Supports:** align, anchor, background (gradient), color (background, gradients, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** level, levelOptions, showCommentsCount, showPostTitle

Cover

Add an image or video with a text overlay.

- **Name:** core/cover
- **Category:** media
- **Supports:** align, allowedBlocks, anchor, color (button, heading, link, text, ~~background~~, ~~enableContrastChecker~~), dimensions (aspectRatio, minWidth), filter (duotone), interactivity (clientNavigation, interactive), layout (~~allowJustification~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** allowedVideoProviders, alt, backgroundType, contentPosition, customGradient, customOverlayColor, dimRatio, focalPoint, gradient, hasParallax, id, isDark, isRepeated, isUserOverlayColor, minHeight, minHeightUnit, overlayColor, poster, sizeSlug, tagName, templateLock, url, useFeaturedImage

Details

Hide and show additional content.

- **Name:** core/details
- **Category:** text
- **Supports:** align (full, wide), allowedBlocks, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minWidth), interactivity (clientNavigation), layout (~~allowEditing~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** name, placeholder, showContent, summary

Embed

Add a block that displays content pulled from other sites, like Twitter or YouTube.

- **Name:** core/embed
- **Category:** embed
- **Supports:** align, anchor, dimensions (minHeight, minWidth), interactivity (clientNavigation), spacing (margin, padding)
- **Attributes:** allowResponsive, caption, previewable, providerNameSlug, responsive, type, url

File

Add a link to a downloadable file.

- **Name:** core/file
- **Category:** media
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, ~~text~~), dimensions (minHeight, minWidth), interactivity, shadow, spacing (margin, padding), typography (fontSize, lineHeight)
- **Attributes:** blob, displayPreview, downloadButtonText, fileId, fileName, href, id, previewHeight, showDownloadButton, textLinkHref, textLinkTarget

Footnotes

Display footnotes added to the page.

- **Name:** core/footnotes

- **Category:** text
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~inserter~~, ~~multiple~~, ~~reusable~~

Classic

Use the classic WordPress editor.

- **Name:** core/freeform
- **Category:** text
- **Supports:** ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~lock~~, ~~renaming~~, ~~reusable~~, ~~visibility~~
- **Attributes:** content

Gallery

Display multiple images in a rich gallery.

- **Name:** core/gallery
- **Category:** media
- **Allowed Blocks:** core/image
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, ~~text~~), dimensions (minHeight, minWidth), filter (duotone), interactivity (clientNavigation), layout (allowEditing, allowSizingOnChildren, default, ~~allowInheriting~~, ~~allowJustification~~, ~~allowOrientation~~, ~~allowSwitching~~, ~~allowVerticalAlignment~~ , ~~allowWrap~~), listView, shadow, spacing (blockGap, margin, padding), units (em, px, rem, vh, vw), ~~html~~
- **Attributes:** allowResize, aspectRatio, caption, columns, dynamicContent, fixedHeight, ids, imageCrop, images, linkTarget, linkTo, navigationButtonType, randomOrder, shortCodeTransforms, sizeSlug

Group

Gather blocks in a layout container.

- **Name:** core/group

- **Category:** design
- **Supports:** align (full, wide), allowedBlocks, anchor, ariaLabel, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout (allowSizingOnChildren), position (sticky), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight, textColumns), ~~html~~
- **Attributes:** tagName, templateLock

Heading

Introduce new sections and organize content to help visitors (and search engines) understand the structure of your content.

- **Name:** core/heading
- **Category:** text
- **Supports:** __unstablePasteTextInline, align (full, wide), anchor, background (backgroundClip, backgroundImage, backgroundSize, gradient), className, color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), splitting, typography (fitText, fontSize, lineHeight, textAlign, textIndent, textShadow)
- **Attributes:** content, level, levelOptions, placeholder

Home Link

Create a link that always points to the homepage of the site. Usually not necessary if there is already a site title link present in the header.

- **Name:** core/home-link
- **Category:** design
- **Parent:** core/navigation
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** description, label, opensInNewTab

Custom HTML

Add custom HTML code and preview it as you edit.

- **Name:** core/html
- **Category:** widgets
- **Supports:** interactivity (clientNavigation), listView, ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~visibility~~
- **Attributes:** content

Icon

Insert an SVG icon.

- **Name:** core/icon
- **Category:** media
- **Supports:** align (center, left, right), anchor, ariaLabel, background (backgroundImage, backgroundSize, gradient), color (background, text), dimensions (minHeight, minWidth, width), interactivity (clientNavigation), shadow, spacing (margin, padding), ~~html~~
- **Attributes:** flipHorizontal, flipVertical, icon, rotation

Image

Insert an image to make a visual statement.

- **Name:** core/image
- **Category:** media
- **Supports:** align (center, full, left, right, wide), anchor, color (~~background~~, ~~text~~), filter (duotone), interactivity, shadow, spacing (margin)
- **Attributes:** alt, aspectRatio, blob, caption, focalPoint, height, href, id, isDecorative, lightbox, linkClass, linkDestination, linkTarget, rel, scale, sizeSlug, title, url, width

Latest Comments

Display a list of your most recent comments.

- **Name:** core/latest-comments
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity

(clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** commentsToShow, displayAvatar, displayContent, displayDate

Latest Posts

Display a list of your most recent posts.

- **Name:** core/latest-posts
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** addLinkToFeaturedImage, categories, displayAuthor, displayFeaturedImage, displayPostContent, displayPostContentRadio, displayPostDate, excerptLength, featuredImageAlign, featuredImageSizeHeight, featuredImageSizeSlug, featuredImageSizeWidth, order, orderBy, postsToShow, selectedAuthor

List

An organized collection of items displayed in a specific order.

- **Name:** core/list
- **Category:** text
- **Allowed Blocks:** core/list-item
- **Supports:** __unstablePasteTextInline, align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), listView, shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** ordered, placeholder, reversed, start, type, values

List Item

An individual item within a list.

- **Name:** core/list-item

- **Category:** text
- **Parent:** core/list
- **Allowed Blocks:** core/list
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), interactivity (clientNavigation), shadow, spacing (margin, padding), splitting, typography (fontSize, lineHeight), ~~className~~, ~~html~~
- **Attributes:** content, placeholder

Login/out

Show login & logout links.

- **Name:** core/loginout
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), className, color (background, gradients, link, ~~text~~), contentRole, dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight)
- **Attributes:** displayLoginAsForm, redirectToCurrent

Math

Display mathematical notation using LaTeX.

- **Name:** core/math
- **Category:** text
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize), ~~html~~
- **Attributes:** latex, mathML

Media & Text

Set media and words side-by-side for a richer layout.

- **Name:** core/media-text

- **Category:** media
- **Supports:** align (full, wide), allowedBlocks, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), filter (duotone), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** align, focalPoint, href, imageFill, isStackedOnMobile, linkClass, linkDestination, linkTarget, mediaAlt, mediaId, mediaLink, mediaPosition, mediaSizeSlug, mediaType, mediaUrl, mediaWidth, rel, useFeaturedImage, verticalAlignment

Unsupported

Your site doesn't include support for this block.

- **Name:** core/missing
- **Category:** text
- **Supports:** interactivity (clientNavigation), ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~inserter~~, ~~lock~~, ~~renaming~~, ~~reusable~~, ~~visibility~~
- **Attributes:** originalContent, originalName, originalUndelimitedContent

More

Content before this block is shown in the excerpt on blog and archive pages. Where a theme shows the full content instead, visitors get a "Read more" link to the rest of the post.

- **Name:** core/more
- **Category:** design
- **Supports:** interactivity (clientNavigation), ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~multiple~~, ~~visibility~~
- **Attributes:** customText, noTeaser

Navigation

A collection of blocks that allow visitors to get around your site.

- **Name:** core/navigation
- **Category:** theme

- **Allowed Blocks:** core/navigation-link, core/search, core/social-links, core/page-list, core/spacer, core/home-link, core/icon, core/site-title, core/site-logo, core/navigation-submenu, core/loginout, core/buttons
- **Supports:** align (full, wide), anchor, ariaLabel, contentRole, inserter, interactivity, layout (allowSizingOnChildren, default, ~~allowInheriting~~, ~~allowSwitching~~, ~~allowVerticalAlignment~~), spacing (blockGap, units), typography (fontSize, lineHeight), ~~html~~, ~~renaming~~
- **Attributes:** __unstableLocation, backgroundColor, customBackgroundColor, customOverlayBackgroundColor, customOverlayTextColor, customTextColor, hasIcon, icon, maxNestingLevel, overlay, overlayBackgroundColor, overlayMenu, overlayTextColor, ref, rgbBackgroundColor, rgbTextColor, showSubmenuIcon, submenuVisibility, templateLock, textColor

Navigation Link

Add a page, link, or another item to your navigation.

- **Name:** core/navigation-link
- **Category:** design
- **Parent:** core/navigation
- **Allowed Blocks:** core/navigation-link, core/navigation-submenu, core/page-list
- **Supports:** anchor, interactivity (clientNavigation), typography (fontSize, lineHeight), ~~html~~, ~~renaming~~, ~~reusable~~
- **Attributes:** description, id, isTopLevelLink, kind, label, opensInNewTab, rel, title, type, url

Navigation Overlay Close

A customizable button to close overlays.

- **Name:** core/navigation-overlay-close
- **Category:** design
- **Supports:** color (background, text, ~~gradients~~), dimensions (minHeight, minWidth), shadow, spacing (margin, padding), typography (fontSize, lineHeight)
- **Attributes:** displayMode, text

Submenu

Add a submenu to your navigation.

- **Name:** core/navigation-submenu
- **Category:** design
- **Parent:** core/navigation
- **Supports:** anchor, interactivity (clientNavigation), shadow, typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** description, id, isParentSubmenu, isTopLevelItem, kind, label, opensInNewTab, rel, title, type, url

Page Break

Separate your content into a multi-page experience.

- **Name:** core/nextpage
- **Category:** design
- **Parent:** core/post-content
- **Supports:** interactivity (clientNavigation), ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~visibility~~

Page List

Display a list of all pages.

- **Name:** core/page-list
- **Category:** widgets
- **Allowed Blocks:** core/page-list-item
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), contentRole, dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** parentPageID

Page List Item

Displays a page inside a list of all pages.

- **Name:** core/page-list-item

- **Category:** widgets
- **Parent:** core/page-list
- **Supports:** anchor, contentRole, interactivity (clientNavigation), ~~html~~, ~~inserter~~, ~~lock~~, ~~reusable~~
- **Attributes:** hasChildren, id, label, link, title

Paragraph

Start with the basic building block of all narrative.

- **Name:** core/paragraph
- **Category:** text
- **Supports:** __unstablePasteTextInline, align (full, wide), anchor, background (backgroundClip, backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), splitting, typography (fitText, fontSize, lineHeight, textAlign, textColumns, textIndent, textShadow), ~~className~~
- **Attributes:** content, direction, dropCap, placeholder

Pattern Placeholder

Show a block pattern.

- **Name:** core/pattern
- **Category:** theme
- **Supports:** interactivity (clientNavigation), ~~html~~, ~~inserter~~, ~~renaming~~, ~~visibility~~
- **Attributes:** slug

Playlist

Embed a simple playlist.

- **Name:** core/playlist
- **Category:** media
- **Allowed Blocks:** core/playlist-track

- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity, shadow, spacing (margin, padding), typography (fontSize)
- **Attributes:** caption, order, showArtists, showImages, showNumbers, showPlayButtonArtwork, showTrackLength, showTracklist, type, waveformBackgroundColor, waveformBackgroundGradient, waveformColor, waveformGradient, waveformStyle

Playlist track

Playlist track.

- **Name:** core/playlist-track
- **Category:** media
- **Parent:** core/playlist
- **Supports:** interactivity (clientNavigation), ~~html~~, ~~reusable~~
- **Attributes:** album, artist, blob, id, image, imageAlt, length, src, title, type

Author (deprecated)

This block is deprecated. Please use the Avatar block, the Author Name block, and the Author Biography block instead.

- **Name:** core/post-author
- **Category:** theme
- **Supports:** anchor, color (background, gradients, link, text), filter (duotone), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~inserter~~
- **Attributes:** avatarSize, byline, isLink, linkTarget, showAvatar, showBio, textAlign

Author Biography

The author biography.

- **Name:** core/post-author-biography
- **Category:** theme

- **Supports:** anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign, textColumns, textIndent)

Author Name

The author name.

- **Name:** core/post-author-name
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** isLink, linkTarget

Comment (deprecated)

This block is deprecated. Please use the Comments block instead.

- **Name:** core/post-comment
- **Experimental:** fse
- **Category:** theme
- **Allowed Blocks:** core/avatar, core/comment-author-name, core/comment-content, core/comment-date, core/comment-edit-link, core/comment-reply-link
- **Supports:** interactivity (clientNavigation), ~~html~~, ~~inserter~~
- **Attributes:** commentId

Comments Count

Display a post’s comments count.

- **Name:** core/post-comments-count
- **Category:** theme
- **Supports:** anchor, background (gradient), color (background, gradients, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Comments Form

Display a post’s comments form.

- **Name:** core/post-comments-form
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Comments Link

Displays the link to the current post comments.

- **Name:** core/post-comments-link
- **Category:** theme
- **Supports:** anchor, color (background, link, ~~text~~), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Content

Displays the contents of a post or page.

- **Name:** core/post-content
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** tagName

Date

Display a custom date.

- **Name:** core/post-date
- **Category:** theme
- **Supports:** anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** datetime, format, isLink

Excerpt

Display the excerpt.

- **Name:** core/post-excerpt
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign, textColumns), ~~html~~
- **Attributes:** excerptLength, moreText, showMoreOnNewLine

Featured Image

Display a post’s featured image.

- **Name:** core/post-featured-image
- **Category:** theme
- **Supports:** align (center, full, left, right, wide), anchor, color (~~background~~, ~~text~~), filter (duotone), interactivity (clientNavigation), shadow, spacing (margin, padding), ~~html~~
- **Attributes:** aspectRatio, customGradient, customOverlayColor, dimRatio, gradient, height, isLink, linkTarget, overlayColor, rel, scale, sizeSlug, useFirstImageFromPost, width

Post Navigation Link

Displays the next or previous post link that is adjacent to the current post.

- **Name:** core/post-navigation-link
- **Category:** theme

- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~, ~~reusable~~
- **Attributes:** arrow, label, linkLabel, showTitle, taxonomy, type

Post Template

Contains the block elements used to render a post, like the title, date, featured image, content or excerpt, and more.

- **Name:** core/post-template
- **Category:** theme
- **Ancestor:** core/query
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~

Post Terms

Post terms.

- **Name:** core/post-terms
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** prefix, separator, suffix, term

Time to Read

Show minutes required to finish reading the post. Can also show a word count.

- **Name:** core/post-time-to-read
- **Category:** theme

- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** averageReadingSpeed, displayAsRange, displayMode

Title

Displays the title of a post, page, or any other content-type.

- **Name:** core/post-title
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fitText, fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** isLink, level, levelOptions, linkTarget, placeholder, rel

Preformatted

Add text that respects your spacing and tabs, and also allows styling.

- **Name:** core/preformatted
- **Category:** text
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight)
- **Attributes:** content

Pullquote

Give special visual emphasis to a quote from your text.

- **Name:** core/pullquote
- **Category:** text
- **Supports:** align (full, left, right, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions

(minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign, textIndent)
- **Attributes:** citation, value

Query Loop

An advanced block that allows displaying post types based on different query parameters and visual configurations.

- **Name:** core/query
- **Category:** theme
- **Supports:** align (full, wide), anchor, interactivity, layout, spacing (blockGap), ~~html~~
- **Attributes:** enhancedPagination, namespace, query, queryId, tagName

No Results

Contains the block elements used to render content when no query results are found.

- **Name:** core/query-no-results
- **Category:** theme
- **Ancestor:** core/query
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~

Pagination

Displays a paginated navigation to next/previous set of posts, when applicable.

- **Name:** core/query-pagination
- **Category:** theme
- **Ancestor:** core/query
- **Allowed Blocks:** core/query-pagination-previous, core/query-pagination-numbers, core/query-pagination-next
- **Supports:** align, anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), layout (default, ~~allowInheriting~~, ~~allowSwitching~~), spacing

(blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** paginationArrow, showLabel

Next Page

Displays the next posts page link.

- **Name:** core/query-pagination-next
- **Category:** theme
- **Parent:** core/query-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** label

Page Numbers

Displays a list of page numbers for pagination.

- **Name:** core/query-pagination-numbers
- **Category:** theme
- **Parent:** core/query-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), spacing (padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** midSize

Previous Page

Displays the previous posts page link.

- **Name:** core/query-pagination-previous
- **Category:** theme
- **Parent:** core/query-pagination
- **Supports:** anchor, background (gradient), color (background, gradients, ~~text~~), interactivity (clientNavigation), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~
- **Attributes:** label

Query Title

Display the query title.

- **Name:** core/query-title
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (gradient), color (background, gradients, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** level, levelOptions, showPrefix, showSearchTerm, type

Query Total

Display the total number of results in a query.

- **Name:** core/query-total
- **Category:** theme
- **Ancestor:** core/query
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** displayType

Quote

Give quoted text visual emphasis. “In quoting others, we cite ourselves.” — Julio Cortázar

- **Name:** core/quote
- **Category:** text
- **Supports:** align (full, left, right, wide), allowedBlocks, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout (~~allowEditing~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** citation, textAlign, value

Read More

Displays the link of a post, page, or any other content-type.

- **Name:** core/read-more
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** content, linkTarget

RSS

Display entries from any RSS or Atom feed.

- **Name:** core/rss
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), ~~html~~
- **Attributes:** blockLayout, columns, displayAuthor, displayDate, displayExcerpt, excerptLength, feedURL, itemsToShow, openInNewTab, rel

Search

Help visitors find your content.

- **Name:** core/search
- **Category:** widgets
- **Supports:** align (center, left, right), anchor, background (gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity, shadow, spacing (margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** buttonPosition, buttonText, buttonUseIcon, label, placeholder, query, showLabel, tagName, width, widthUnit

Separator

Create a break between ideas or sections with a horizontal separator.

- **Name:** core/separator
- **Category:** design
- **Supports:** align (center, full, wide), anchor, color (background, gradients, ~~enableContrastChecker~~, ~~text~~), interactivity (clientNavigation), spacing (margin)
- **Attributes:** opacity, tagName

Shortcode

Insert additional custom elements with a WordPress shortcode.

- **Name:** core/shortcode
- **Category:** widgets
- **Supports:** ~~className~~, ~~customCSS~~, ~~customClassName~~, ~~html~~, ~~visibility~~
- **Attributes:** text

Site Logo

Display an image to represent this site. Update this block and the changes apply everywhere.

- **Name:** core/site-logo
- **Category:** theme
- **Supports:** align, anchor, color (~~background~~, ~~text~~), filter (duotone), interactivity (clientNavigation), spacing (margin, padding), ~~alignWide~~, ~~html~~
- **Attributes:** isLink, linkTarget, shouldSyncIcon, width

Site Tagline

Describe in a few words what this site is about. This is important for search results, sharing on social media, and gives overall clarity to visitors.

- **Name:** core/site-tagline

- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), contentRole, dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fitText, fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** level, levelOptions

Site Title

Displays the name of this site. Update the block, and the changes apply everywhere it’s used. This will also appear in the browser title bar and in search results.

- **Name:** core/site-title
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fitText, fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** isLink, level, levelOptions, linkTarget

Social Icon

Display an icon linking to a social profile or site.

- **Name:** core/social-link
- **Category:** widgets
- **Parent:** core/social-links
- **Supports:** anchor, interactivity (clientNavigation), ~~html~~, ~~reusable~~
- **Attributes:** label, rel, service, url

Social Icons

Display icons linking to your social profiles or sites.

- **Name:** core/social-links
- **Category:** widgets

- **Allowed Blocks:** core/social-link
- **Supports:** align (center, left, right), anchor, background (gradient), color (background, gradients, ~~enableContrastChecker~~, ~~text~~), contentRole, interactivity (clientNavigation), layout (default, ~~allowInheriting~~, ~~allowSwitching~~, ~~allowVerticalAlignment~~), listView, shadow, spacing (blockGap, margin, padding, units), ~~html~~
- **Attributes:** customIconBackgroundColor, customIconColor, iconBackgroundColor, iconBackgroundColorValue, iconColor, iconColorValue, openInNewTab, showLabels, size

Spacer

Add white space between blocks and customize its height.

- **Name:** core/spacer
- **Category:** design
- **Supports:** anchor, interactivity (clientNavigation), spacing (margin)
- **Attributes:** height, width

Tab List

Display the tab buttons for a tabbed interface.

- **Name:** core/tab-list
- **Category:** design
- **Parent:** core/tabs
- **Supports:** ariaLabel, background (backgroundImage, backgroundSize, gradient), color (background, text), layout (default, ~~allowOrientation~~, ~~allowVerticalAlignment~~, ~~allowWrap~~), shadow, spacing (blockGap, padding), typography (fontSize, lineHeight), ~~html~~, ~~lock~~, ~~visibility~~
- **Attributes:** tabs

Tab Panel

Content for a tab in a tabbed interface.

- **Name:** core/tab-panel
- **Category:** design
- **Parent:** core/tab-panels

- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, heading, link, text), layout, shadow, spacing (blockGap, padding), typography (fontSize, lineHeight), ~~html~~, ~~visibility~~
- **Attributes:** label

Tab Panels

Container for tab panel content in a tabbed interface.

- **Name:** core/tab-panels
- **Category:** design
- **Parent:** core/tabs
- **Allowed Blocks:** core/tab-panel
- **Supports:** background (backgroundImage, backgroundSize, gradient), color (background, button, heading, link, text), dimensions (minHeight), shadow, spacing (padding), typography (fontSize, lineHeight), ~~html~~, ~~lock~~, ~~visibility~~

Table

Create structured content in rows and columns to display information.

- **Name:** core/table
- **Category:** text
- **Supports:** align, anchor, background (gradient), color (background, gradients, link, text), interactivity (clientNavigation), spacing (margin, padding), typography (fontSize, lineHeight, textAlign)
- **Attributes:** body, caption, foot, hasFixedLayout, head

Table of Contents

Summarize your post with a list of headings. Add HTML anchors to Heading blocks to link them here.

- **Name:** core/table-of-contents
- **Experimental:** true
- **Category:** design

- **Supports:** anchor, ariaLabel, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** maxLevel, onlyIncludeCurrentPage, ordered

Tabs

Display content in a tabbed interface to help users navigate detailed content with ease.

- **Name:** core/tabs
- **Category:** design
- **Allowed Blocks:** core/tab-list, core/tab-panels
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, heading, link, text), dimensions (minWidth), interactivity, layout (~~allowEditing~~), shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~
- **Attributes:** activeTabIndex, editorActiveTabIndex

Tag Cloud

A cloud of popular keywords, each sized by how often it appears.

- **Name:** core/tag-cloud
- **Category:** widgets
- **Supports:** align, anchor, background (backgroundImage, backgroundSize, gradient), color (background, link, ~~text~~), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (lineHeight), ~~html~~
- **Attributes:** largestFontSize, numberOfTags, showTagCounts, smallestFontSize, taxonomy

Template Part

Edit the different global regions of your site, like the header, footer, sidebar, or create your own.

- **Name:** core/template-part
- **Category:** theme
- **Supports:** align, interactivity (clientNavigation), ~~html~~, ~~renaming~~, ~~reusable~~
- **Attributes:** area, slug, tagName, theme

Term Count

Displays the post count of a taxonomy term.

- **Name:** core/term-count
- **Category:** theme
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** bracketType

Term Description

Display the description of categories, tags and custom taxonomies when viewing an archive.

- **Name:** core/term-description
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~

Term Name

Displays the name of a taxonomy term.

- **Name:** core/term-name
- **Category:** theme
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fontSize, lineHeight, textAlign), ~~html~~
- **Attributes:** isLink, level, levelOptions

Term Template

Contains the block elements used to render a taxonomy term, like the name, description, and more.

- **Name:** core/term-template
- **Category:** theme
- **Ancestor:** core/terms-query
- **Supports:** align (full, wide), anchor, background (backgroundImage, backgroundSize, gradient), color (background, button, gradients, heading, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), layout, shadow, spacing (blockGap, margin, padding), typography (fontSize, lineHeight), ~~html~~, ~~reusable~~

Terms Query

An advanced block that allows displaying taxonomy terms based on different query parameters and visual configurations.

- **Name:** core/terms-query
- **Category:** theme
- **Supports:** align (full, wide), anchor, interactivity, layout, spacing (blockGap, margin, padding), ~~html~~
- **Attributes:** tagName, termQuery

Text Columns (deprecated)

This block is deprecated. Please use the Columns block instead.

- **Name:** core/text-columns
- **Category:** design
- **Supports:** interactivity (clientNavigation), ~~inserter~~
- **Attributes:** columns, content, width

Poetry

Insert poetry. Use special spacing formats. Or quote song lyrics.

- **Name:** core/verse

- **Category:** text
- **Supports:** anchor, background (backgroundImage, backgroundSize, gradient), color (background, gradients, link, text), dimensions (minHeight, minWidth), interactivity (clientNavigation), shadow, spacing (margin, padding), typography (fitText, fontSize, lineHeight, textAlign, textColumns, textIndent)
- **Attributes:** content

Video

Embed a video from your media library or upload a new one.

- **Name:** core/video
- **Category:** media
- **Supports:** align, anchor, dimensions (minHeight, minWidth), filter (duotone), interactivity (clientNavigation, interactive), shadow, spacing (margin, padding)
- **Attributes:** autoplay, blob, caption, controls, height, id, loop, muted, playsInline, poster, preload, src, tracks, width
