Icon

- Props
  - icon
  - size

See the WordPress Storybook for more detailed, interactive documentation.

Renders a raw icon without any initial styling or wrappers.

```
import { wordpress } from '@wordpress/icons';

<Icon icon={ wordpress } />
```

Props

icon

- Type: `IconType | null`
- Required: No
- Default: `null`

The icon to render. In most cases, you should use an icon from
the `@wordpress/icons` package.

Other supported values are: component instances, functions,
Dashicons
(specified as strings), and `null`.

The `size` value, as well as any other additional props, will be passed through.

size

- Type: `number`
- Required: No
- Default: `'string' === typeof icon ? 20 : 24`

The size (width and height) of the icon.

Defaults to `20` when `icon` is a string (i.e. a Dashicon id), otherwise `24`.
