title: graphql_authentication_error_status_code hookType: filter hookGroup: authentication plugin: wp-graphql

graphql_authentication_error_status_code

```
apply_filters( 'graphql_authentication_error_status_code', 403, $auth_error );
```

Filter the HTTP status code returned for authentication errors. By default, invalid nonce errors return 403 Forbidden. Some clients may expect 200 with a GraphQL error response instead.

- **Type:** filter
- **Group:** Authentication and Authorization
- **Since:** 2.6.0
- **Source File:** `plugins/wp-graphql/src/Router.php`

Parameters

- `$status_code` (`int`): The HTTP status code. Default 403.
- `$auth_error` (`\WP_Error`): The authentication error.

Source

- `plugins/wp-graphql/src/Router.php:492`

```
apply_filters( 'graphql_authentication_error_status_code', 403, $auth_error );
```
