title:

graphql_connection_loader_name

hookType: filter hookGroup:

connections plugin: wp-graphql

graphql_connection_loader_n
ame

```
apply_filters( 'graphql_connection_loader_name', $name, $this );
```

Filters the loader name. This is the name of the registered DataLoader that will be used to load the data for the connection.

- **Type:** filter
- **Group:** Connections
- **Since:** 0.0.6
- **Source File:** `plugins/wp-graphql/src/Data/Connection/AbstractConnectionResolver.php`

Parameters

- `$loader_name` (`string`): The name of the loader.
- `$resolver` (`self`): The `AbstractConnectionResolver` instance.

Source

- [plugins/wp-graphql/src/Data/Connection/AbstractConnectionResolver.php:564](#)

```
apply_filters( 'graphql_connection_loader_name', $name, $this );
```
