title: is_valid_graphql_name docType: function plugin: wp-graphql

is_valid_graphql_name

```
is_valid_graphql_name( string $type_name ): bool;
```

Check if the name is valid for use in GraphQL

- **Since:** 0.14.0
- **Source File:** `plugins/wp-graphql/access-functions.php`

Parameters

- `$type_name` (`string`): The name of the type to validate

Return

- `bool`: True if the name is valid for use in GraphQL, false otherwise.

Source

- `plugins/wp-graphql/access-functions.php:842`

```
function is_valid_graphql_name( string $type_name ): bool {
```
