if (is_graphql_http_request()) { wp_send_json(['server' =>..."

This snippet outputs the `$_SERVER` superglobal so we can see if the Authorization token is being passed to the server or not.

```
add_action( 'init', function() {

□if ( is_graphql_http_request() ) {
□□wp_send_json( [ 'server' => $_SERVER ] );
□}

} );
```
